Olfia Rachmi W

AI Engineer | Computer Vision & Full-stack Developer
Bali, Indonesia | olfiarachmi@gmail.com | +62 852-2008-5600 | linkedin.com/in/olfia-rachmi | github.com/olfiarach

SUMMARY

AI engineer with 3+ years of production web development (React, Next.js, TypeScript) and hands-on computer vision experience. Built and deployed a real-time YOLOv8 banknote detector for visually impaired merchants, reaching above 90% mAP@50 with FastAPI inference under 150 ms. Seeking AI Engineer, Computer Vision Engineer or AI Full-stack roles, remote or hybrid in Bali.

TECHNICAL SKILLS

AI / Computer Vision: Python, PyTorch, YOLOv8, OpenCV, Roboflow, data augmentation, object detection, mAP evaluation
Model Serving & Backend: FastAPI, REST APIs, Node.js, Firebase, Realm
Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Vue.js, React Native, Webflow
Tools & APIs: Git, Figma, Google Maps Geolocation API, WebRTC, Zoom API, SEO, web performance

AI PROJECT

Real-time Rupiah Banknote Recognition | Personal Project
YOLOv8, PyTorch, Roboflow, FastAPI | End-to-end build

- Built a YOLOv8 object detector that identifies Indonesian Rupiah banknotes in real time to help visually impaired micro-merchants verify cash.
- Curated and augmented the dataset in Roboflow for folded, worn and poorly lit notes, then tuned the model to above 90% mAP@50.
- Deployed the model behind a FastAPI endpoint with inference under 150 ms per request.

EXPERIENCE

Coding Instructor (Python, JavaScript, Vue.js, React Native) | Timedoor Academy
Jul 2022 - Present, part-time | Bali, Hybrid

- Taught students across Indonesia, MENA and Australia in person and online, with a 98% final-project completion rate.
- Taught Python foundations for AI and data structures; supervised full-stack mobile capstones built on Realm and Firebase.
- Mentored 11 scholarship learners (Selukat Learning Center x Timedoor) through code reviews and Git workflow.

Web Specialist & Front-End Developer | Freelance
Mar 2026 - Jun 2026 | Remote

- Built a luxury hotel directory in Webflow CMS with multi-reference collections for location and category filtering.
- Wrote custom CSS with fluid typography and custom JavaScript; tuned image rendering, performance and SEO metadata.

Full-stack Developer | Semantu
Apr 2023 - May 2025 | Bali, Hybrid

- Built and deployed modular, cross-platform web apps with React.js and Tailwind CSS, improving rendering speed and user flow.
- Integrated the Google Maps Geolocation API and WebRTC/Zoom video streaming into production apps.
- Refactored legacy code into reusable component libraries, cutting new-feature development time by 20%.

Frontend Developer | Venatronics LLC
Nov 2022 - Jan 2023 | Bali, Hybrid

- Took the company's flagship website from Figma to production in React.js with an initial page load under 2 seconds.
